

Located in London, OpenRad delivers innovative radiology solutions for static and mobile diagnostic imaging centres worldwide—amongst them hospitals, clinics, doctor's surgeries and trailers. OpenRad aims to empower healthcare professionals and the wider research community by connecting people, technology and data.

OpenRad can fully digitalise workflow processes within radiological diagnostics and across multidisciplinary teams. Its zero-footprint and SaaS based solutions speed up implementation, increase centre utilisation, provide remote access, and reduce cost of ownership.

OpenRad's Next-Generation Imaging Platform

The cloud-native and cross-tech integrated solution for distributed imaging workflows offers its user:

- A cloud-collaborative environment
- An intelligent orchestration engine
- AI/Neural network-enabled image processing
- 360° viewing & structured reporting
- A ubiquitous data lake

Profit from our products!

=> OpenRad Cloud (by Biotronics3D) is our all-in-one cloud-native imaging and reporting platform.

=> OpenRad Cube (by Visbion) is our mobile image management solution.

Do you want to learn more about OpenRad and our solutions? We are happy to set up a demo for you. Please send us an email to welcome@openrad.com.

OUR VISION

Empowered people leading healthier lives through accessible & effective diagnostics

We envisage a healthier future powered by intelligence and connectivity. This will improve teleradiology, diagnostics and clinical decision-making for all.

TOP BENEFITS

- Solutions meet needs of any remote reporting requirement
- Immediate platform access from any device connected to the Internet
- Managing complex workflows spanning multiple organisational & technical boundaries
